PROFESSIONAL SUMMARY

- Data Analyst and Data Scientist profession, with 8+ years of experience designing and leading data provisioning pipelines, sampling frameworks, and complex analytical programs in large, multi-stakeholder environments.
- Proven ability to translate complex business requirements into precise data specifications, implement advanced data-mapping logic, and communicate insights to both technical and non-technical audiences.
- Reporting and visualization specialist with strong statistical inference skills; currently completing the Master of Data Science at UBC (June 2026).

CORE COMPETENCIES

- | | | |
|------------------------------|-------------------------------------|---------------------------------------|
| • SQL Python R | • Predictive Modelling | • Cohort, Funnel & Retention Analysis |
| • Tableau Power BI | • Inferential & Bayesian Statistics | • Cross-Functional Leadership |
| • Git Agile Sprint | • Segmentation & Clustering | • Communication |
| • Cloud Platforms & Services | • A/B Testing LTV Modeling | • Operation Management |
| • Telemetry Design | • Machine Learning LLMs | |

PROJECTS AND ACHIEVEMENTS

Product Behavioural Anomaly Detection — Kabam (2025)

- Designed event-level sampling checkpoints and anomaly-detection frameworks; established data validation logic that strengthened platform integrity KPIs.

Feature Usage & Content Strategy Insights — I Got Games (2022)

- Built automated Google BigQuery pipelines for multi-context feature tracking; delivered data provisioning infrastructure that powered content prioritization and cross-team reporting.

Customer Segmentation & Lifetime Value Modeling — Blastworks (2019)

- Applied clustering-based segmentation and predictive LTV models; insights informed UA strategy and longer-term revenue planning.

WORK EXPERIENCE

Data Analyst — Kabam Games

Vancouver, BC | December 2023 – August 2025

- Led analytics projects for live-service titles, transforming player telemetry into insights that informed feature design, content updates, and operational decisions.
- Automated recurring analytics workflows and reporting pipelines, significantly improving efficiency and reducing operational risk.
- Partnered with PMs, designers, engineers, and live-ops to validate telemetry and ensure reliable data flows across complex game systems.
- Conducted behavioural analyses identifying purchasing patterns, user journeys, anomalies, and balance-related insights.

WORK EXPERIENCE CONT.

Senior Data Analyst — PocketSocial Technologies / I Got Games

Vancouver, BC | July 2021 – August 2023

- Built ELT pipelines and analytics database powering dashboards and live-ops monitoring, improving information accessibility for designers and producers.
- Led cross-functional analytics initiatives across product, engineering, and marketing; translated ambiguous business questions into precise data requirements, delivering segmentation, clustering, and behavioural analyses that shaped content strategy and roadmap priorities.
- Mentored junior analysts and established analytics best practices, strengthening internal processes and accelerating onboarding.

Data Analyst — Blastworks Technologies / Gaming Realms

Victoria, BC | September 2018 – July 2021

- Architected a unified analytics data lake enabling centralized data provisioning across multiple business lines, standardizing KPI reporting and supporting corporate data strategy at scale.
- Designed cohort-retention dashboards, funnel analyses, and performance monitoring reports that provided actionable insights to live-ops and leadership teams.
- Applied clustering methods and developed LTV predictive models guiding user acquisition targeting strategy, contributing to sustained multi-year revenue growth.

Sales Operations Analyst — STEMCELL Technologies

Vancouver, BC | January 2017 – August 2017

- Conducted affinity analysis and LTV modelling on transactional sales data, applying market-research techniques to improve targeting, promotional planning, and customer value assessment.
- Built automated cross-sell reporting dashboards by translating business requirements into data specifications for sales and marketing operations, improving data accessibility for non-technical stakeholders.

EDUCATION

University of British Columbia (UBC)

Master of Data Science

2025 – Present | Expected Completion: June 2026

Simon Fraser University (SFU)

Bachelor of Business Administration — Joint Major in Business + Computing Science

2012 – 2018

CERTIFICATION

Microsoft (2023) — AZ-900: Azure Fundamentals

Microsoft (2023) — DP-900: Azure Data Fundamentals

Simon Fraser University (2018) — Business Analytics and Decision Making
