PROFESSIONAL SUMMARY

- Senior Data Analyst and Data Scientist with 8+ years of experience building analytics dashboards, data pipelines, telemetry frameworks, and statistical models for live-service gaming and digital products.
- Expert in SQL, Tableau, and BI tooling, with a strong foundation in statistical inference and machine learning using Python and R. Skilled in architecting scalable cloud data infrastructure and orchestrating automated pipelines across GCP (BigQuery, Cloud Composer/Airflow) and AWS.
- Adept at translating ambiguous business questions into precise data requirements, delivering actionable insights that drive product development, monetization strategies, and user retention.

WORK EXPERIENCE

Data Analyst — Kabam Games

Vancouver, BC | 2023.12 – 2025.08

- Led analytics projects for live-service titles, transforming player telemetry into insights that informed feature design, content updates, and operational decisions.
- Automated recurring analytics and anomaly detection pipelines using stored procedures, driving operational efficiency and proactively identifying metric deviations without manual intervention.
- Partnered with PMs, designers, engineers, and live-ops to validate telemetry and ensure reliable data flows across complex game systems.
- Leveraged funnel and cohort analyses to identify friction points in user journeys, progression bottlenecks, and economy anomalies, directly informing product and balance updates.

Senior Data Analyst — PocketSocial Technologies / I Got Games

Vancouver, BC | 2021.07 – 2023.08

- Built ELT pipelines and analytics database powering live-ops dashboards, enabling self-service analytics and accelerating decision-making for designers and producers.
- Led cross-functional analytics initiatives across product, engineering, and marketing. Translated ambiguous business questions into precise data requirements, delivering clustering and behavioural analyses that shaped content strategy and roadmap priorities.
- Mentored junior analysts and formalized analytics best practices by implementing peer code reviews and standardized SQL guidelines, strengthening team output and accelerating onboarding.

Data Analyst — Blastworks Technologies / Gaming Realms

Victoria, BC | 2018.09 – 2021.07

- Architected a unified analytics data lake enabling centralized data provisioning across multiple business lines, standardizing KPI reporting and supporting corporate data strategy at scale.
- Designed cohort-retention dashboards, funnel analyses, and performance monitoring reports that provided actionable insights to live-ops and leadership teams.
- Built LTV models and clustering frameworks to separate high-value players from casual traffic, providing the User Acquisition team with the precise targeting data needed to optimize ad spend.

Sales Operations Analyst (Co-op) — STEMCELL Technologies

Vancouver, BC | 2017.01 – 2017.08

- Conducted affinity analysis and LTV modeling on transactional sales data, applying market-research techniques to optimize audience segmentation and shape data-driven promotional calendars.
- Engineered automated cross-sell reporting pipelines and dashboards, empowering sales and marketing operations with the real-time, self-service insights needed to rapidly identify revenue opportunities.

CORE COMPETENCIES

- **Languages & BI:** SQL, Python (Scikit-learn, Pandas), R (Tidyverse), Tableau, PowerBI
- **Cloud & Engineering:** GCP (BigQuery, Composer/Airflow), AWS (EC2, S3, EMR), Git
- **Data Science & Stats:** Predictive & LTV Modeling, Machine Learning, Inferential & Bayesian Statistics
- **Product Analytics:** Telemetry Design, A/B Testing, Funnel & Cohort Analysis, ETL/ELT Pipeline Design

PROJECTS AND ACHIEVEMENTS

Species Synonym Search Platform — UBC MDS Capstone (2026)

- Architected a plugin-based FastAPI/Next.js client contract integration 20+ external taxonomic APIs; backed by GitHub Actions CI/CD and a fixture-based pytest suite.

Product Behavioural Anomaly Detection — Kabam (2025)

- Designed event-level sampling checkpoints and anomaly-detection frameworks; established data validation logic that strengthened platform integrity KPIs.

Feature Usage & Content Strategy Insights — I Got Games (2022)

- Built automated Google BigQuery pipelines for multi-context feature tracking; delivered data provisioning infrastructure that powered content prioritization and cross-team reporting.

Customer Segmentation & Lifetime Value Modeling — Blastworks (2019)

- Applied clustering-based segmentation and predictive LTV models; insights informed UA strategy and longer-term revenue planning.

EDUCATION

University of British Columbia (UBC)

2025 – 2026

Master of Data Science

Simon Fraser University (SFU)

2012 – 2018

Bachelor of Business Administration — Joint Major in Business + Computing Science

CERTIFICATION

Microsoft (2023) — AZ-900: Azure Fundamentals

Microsoft (2023) — DP-900: Azure Data Fundamentals

Simon Fraser University (2018) — Business Analytics and Decision Making
